

Class 2 LED Non-Tearaway Safety Vest

Thank you for purchasing our LED Vest.

Included:

- LED Class 2 Safety Vest (**Exhibit A**)
- 2200 mAh Lithium Ion Rechargeable Battery
- Micro USB Wall Charger

Operation of the LED Vest:

1. Plug the battery into the power cord located on the inside of the vest behind the power button (**Exhibit B**). The battery should be fully charged before use.
2. Use the power/function button on the front of the vest (**Exhibit C**) to turn the functions on: Fast Flash, Slow Flash, On, and Off.
3. When the LEDs start to dim, turn the vest off, remove the battery, and follow the charging instructions below.

Charging Instructions:

1. Plug the charger into a 120/240 VAC wall outlet
2. Insert the Micro-USB or USB-c end in the battery's charge port.
3. When the LED indicator flashes red, this means that the battery is being charged. A solid red glow indicates that the battery is fully charged.

**** A discharged battery will take approximately 3-4 hours to completely charge. Please only use the included battery or a manufacture's replacement with your Stop-Lite Products**

**** Stop-Lite batteries should be fully charged at least once every 6 months.**

****Note that your vest battery can also function as a power bank by simply connecting a USB Cord to the batteries port to charge other devices.**

Care and Maintenance:

- Don't expose the vest to arc flashes or fire hazards.
- Don't submerge in water or expose the battery, switch, or wiring to direct or excessive moisture.
- Store in a dry place away from direct sunlight.
- Inspect for damage to magnetic connections and electrical components before each use.
- Machine wash separately on a gentle cycle. Hang to dry and do not wash more than 20 times.
- DO NOT iron, bleach, dry clean, or put in the dryer.
